Learning therapeutically

Art & Craft

Children at SPYM centres are encouraged to involve in art and craft activities. With Rakshabandhan, Eid, Janmasthanmi and Independence day, the month of August gave them many opportunities to get their creative juices flowing.

Not just art and craft, but children also take dance classes. The dance sessions help them to rejuvenate. Students, along with the help of their faculty members curated performances to celebrate the wide range of festivals.

Awareness and Outreach

At Government Achievement & Schemes Expo, SPYM's members were present for Drug Abuse and Prevention Awareness. The event was in Pragati Maidan to focus on achievements and programmes of the Government. Like other programmes, this programme was also aimed at reaching out to the common people and have an engaging conversation about Drugs Prevention.

Events such as this where we get to interact with people outside of our scope of work help us to demystify the process of drug prevention and de-addiction

Capacity Building

Training of Teachers Programme at Chandigarh

SPYM believes that educating and empowering the educators and trainers is an important aspect of sensitizing the masses against Drug Use. As an organisation that works towards the cause, SPYM holds many workshops and events where inter-

action with the faculty members and other professionals are facilitated to increase awareness. A programme called Training of Teachers was organised by Social Welfare Department in Chandigarh. The sessions were facilitated

by SPYM. A total of 24 participants were trained who will, in turn, train 330 school teachers of 165 schools of Chandigarh. Sessions on effective communication, life skills, refusal skills, expressing emotions and drug prevention

were organised followed by a visit to a Drug De-addiction and Rehabilitation Centre. Activities and brainstorming sessions were also conducted in which the participants participated wholeheartedly.

Project Monitoring Committee Meeting at Kerala
